

TETRA TOWN

Tetra-Town is a colourful street-studio of recycled milk- and juice-packages. Chairs, stools, lamps, pillows and even our parasol is made out of empty packages. It's a combination of fashion, theater and recycling. An old fashioned record player plays a country song on the Tetra-terrace. People enjoy the sunshine or look for shadow under the Tetra-parasol in a Tetra-beach chair.

Tetra-Tinus is our mascotte and our empty package collector robot. The packages are made of plastic, a thin layer of aluminium, and a thick layer of cardboard. It's strong and waterproof. In Tetra-Town we show what can be done with a bit of fantasy and skill. With the help of our crafty tetra-hat makers every visitor can make a unique hat that fits and that will last all summer.
